

Grade 8 Science – Tanning Poster Challenge:

Instructions: Research the dangers of tanning and create a Google Slides to raise awareness of the dangers associated with tanning.

Questions to consider when researching:

- What are the dangers of tanning?
- Is skin cancer treatable? What are the symptoms?
- What part of the electromagnetic spectrum is responsible?
- Does sunlight differ from tanning bed light? Are they both a risk?
- Does Canada/the provinces have age restrictions on tanning beds?
- Are tanning beds considered addictive?
- Are there other dangers other than cancer?
- Why do people continue to use them if they are dangerous?

Focus on creativity, colour, neatness, and content. You should have at least four pictures
